

TORCH™

ADVANCED LIQUID DE-ICER

Safer Road Conditions Faster and Longer Lasting with TORCH™

Plowing snow at night on a high mountain pass can be a dark, lonely place. The public is counting on you to make the roads safe so they can get where they need to go safely.

A TORCH™ often symbolizes light and heat, a way forward through a dark place. TORCH™ Liquid De-icer is the next step in de-icing technology. TORCH™ provides our Winter Maintenance Professionals a liquid de-icer with the heat to start melting fast, on contact, and has the staying power for the long turnarounds on rural roads.

A liquid de-icer that will start acting fast and last until you are able to get back, TORCH™ is the new, exciting way forward in Winter Maintenance Technology. To get your roads clear and safe fast, follow the light of TORCH™.

Over 50 Years in Business

TORCH™ is a culmination of past, present, and future attributes that allows it to be the premier de-icing product. TORCH™ addresses the ever-changing conditions that snow and ice professionals deal with from storm to storm.

TORCH™ PROVIDES THE FLEXIBILITY BY THE FOLLOWING ATTRIBUTES:

- Provides a quick burn that brings the road surface back to a safe condition faster.
- Extended performance allowing for prolonged times between re-application, maximizing fleet efficiency.

- Product stability that provides a consistent product in storage and application.
- Performance at lower temperatures even after a 1 to 1 dilution.
- Reduced application rates compared to typical de-icing products.
- PNS approved product.
- Enhanced performance at a competitive price.
